SUSTAINABILITY BULLETIN

NO 3

2026 JUNE

Sustainability Bulletin

Dear Stakeholders,

We are pleased to share the third issue of the EMSA Sustainability Bulletin “SUSTAINEMSABILITY” with you.

In this bulletin, we highlight the latest sustainability developments and initiatives of EMSA Group companies and share them with you, our valued stakeholders on a regular basis.

EMSA
GENERATOR

EMSA

Sustainability Report is now available!

We published the English version of our EMSA 2024 Sustainability Report to the public in March.

English version of the report includes all of EMSA Generator's operational activities carried out in 2024. Our reporting efforts for continuing based on the available data in 2025.

Water Efficiency Management

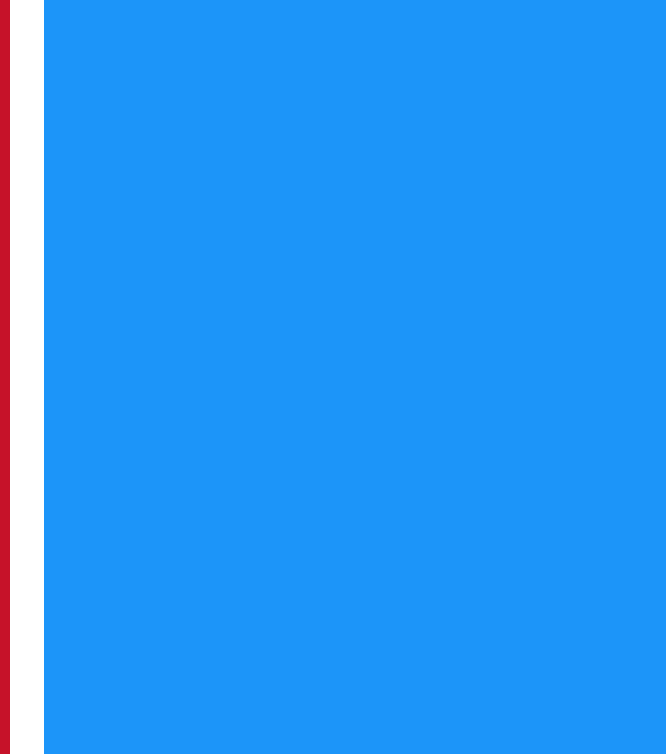

We have launched initiatives related to water efficiency management at our EMSA Eskişehir Production Facility and our NOVAFORM Machine Production Facility. EMSA & NOVAFORM companies are working five-year Water Efficiency Plan on a long-term.

Corporate Sustainability Training

We completed our Corporate Sustainability Training. Comprehensive sustainability training sessions were presented by Eşref TOPKOÇ for our EMSA Generator employees.

As part of Corporate Sustainability Training, interactive and paper-based assessments were completed following the training sessions. We presented certificates 107 employees who successfully completed the program from EMSA Academy.

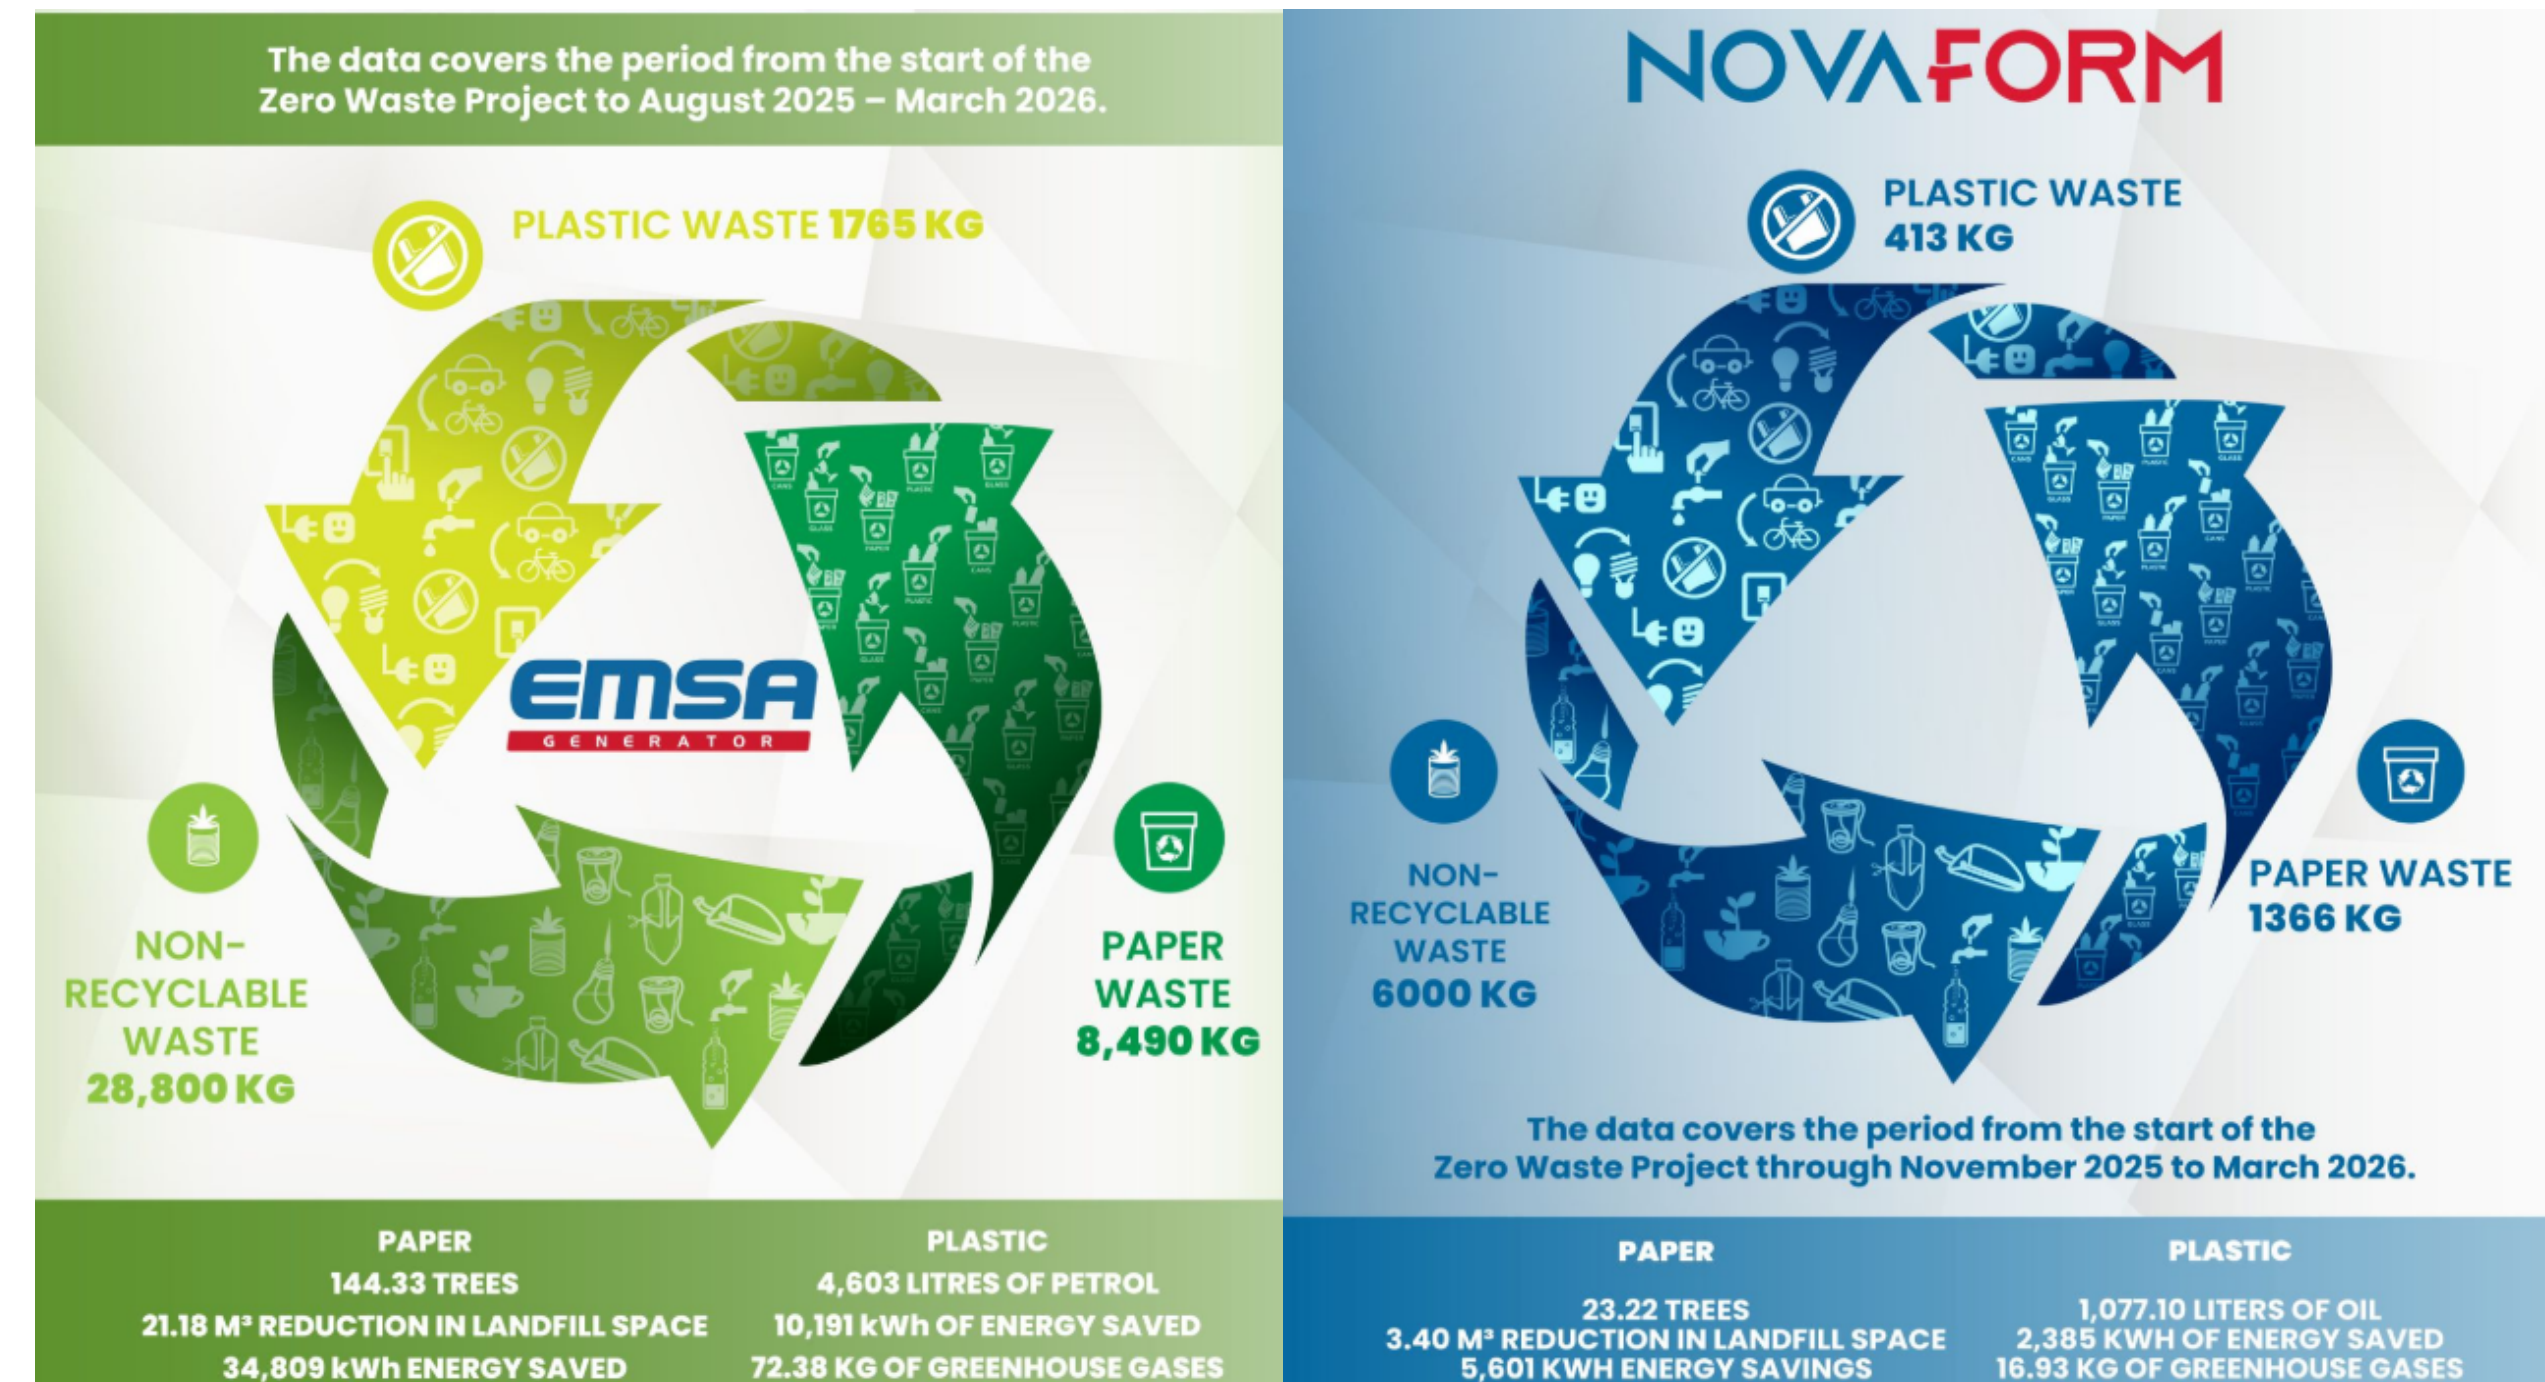

30 March International Zero Waste day:

We're recycling our waste through

Our zero waste project

Leaving a sustainable world for future generations is not only a choice, but also a shared responsibility for all of us. In this context, on the International Zero Waste Day on March 30, as we accelerate our transition to a circular economy, we are once again reminding everyone that our natural resources are not unlimited.

By adopting an approach that protects while producing and transforms while consuming, we eliminate waste at its source, thereby contributing to the protection of our ecosystem. Because sustainability is not just a theoretical concept—it is a way of doing business that is put into action at every step.

Sustainability Corporate Social Responsibility Projects

Our sustainability projects are continued with the voluntary participation of our employees in our social responsibility projects.

Our social responsibility project was titled "There's Energy on This Stage!", carried out on June 5 at our EMSA Eskişehir Plant.
